REMARKS

This Amendment, submitted in response to the Decision on Appeal dated August 31, 2006, is believed to be fully responsive to each point of rejection raised therein. Accordingly, favorable reconsideration on the merits is respectfully requested.

Claims 1-43 are all the claims pending in the application.

Applicant has amended independent claim 1 to recite:

"...wherein for the content object, storing as a file object within the data repository, the list of content entity identifiers indicating the content entities within the content object, wherein a hierarchical arrangement of the content entity identifiers within the list includes at least one hierarchical tier and at least one subordinate tier and corresponds to a user-defined content object hierarchical structure, and

storing the content entities within the data repository as a plurality of file objects, each containing a content entity, wherein the content entity identifiers each include identification information identifying the content file object containing the content entity associated with that identifier."

Applicant submits that the prior art cited by the Examiner does not disclose the claimed content object storing a file object within a data repository and the storing of content entities within the data repository as a plurality of file objects or the hierarchical arrangement of content entity identifiers in hierarchical tiers as claimed. Further, there is no teaching or suggestion of content entity identifiers each including identification information identifying the content file object containing the content entity associated with that identifier. For at least the above reasons, claim 1 and its dependent claims should be deemed allowable. To the extent claims 4, 8, 11, 15, 18, 40 and 42 recite similar subject matter, claims 4, 8, 11, 15, 18, 40 and 42 and their dependent claims should also be deemed allowable for at least the same reasons.

Attorney Docket No. A8519
